

ConSeal

Protect and renovate buildings professionally

Tile construction elements & waterproofing membrane

Lightweight construction elements and sealing membrane for the tiling professional

Bathroom design and waterproofing, made easy and fast.

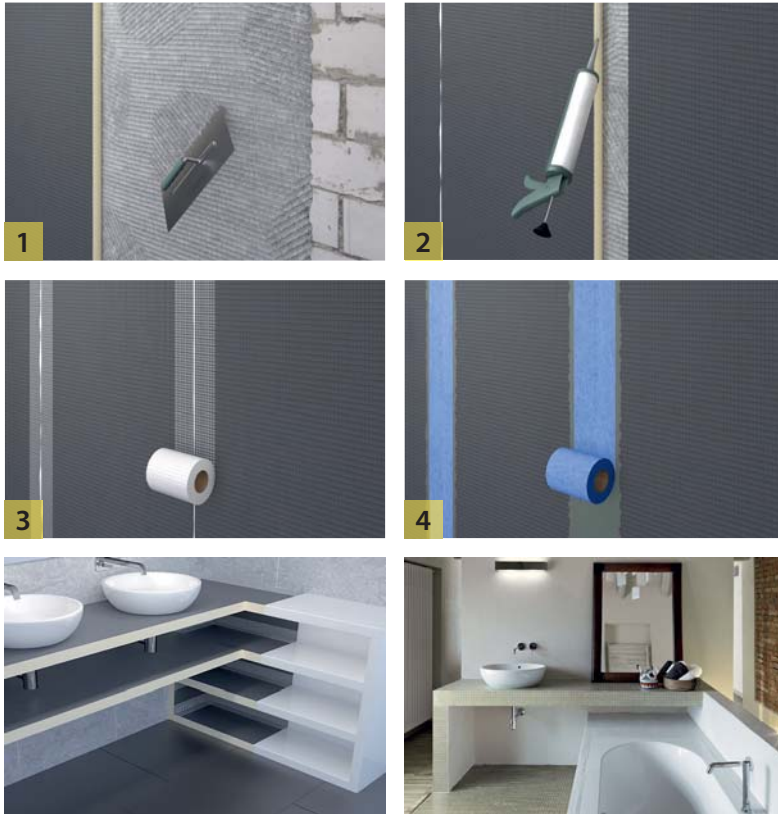

Both in new construction and in renovation.

Simple, easy, fast, safe and durable!

Tile construction elements & waterproofing membrane

Building boards

Absolutely waterproof

Low weight

Easy to process

High compressive strength

Angle elements

Directly trowelable, tileable and also plasterable

For an indoor climate with high moisture exposure

Saves the processor time and money

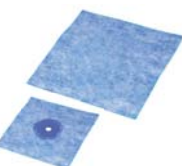

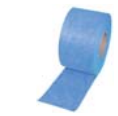

High form stability

Versatile applicable tile building elements:

- Interior design
- Substrate preparation and equalization
- Planking and bridging of critical substrates

- Creation of partition walls
- Construct of bathroom and kitchen furniture
- Application in damp rooms such as bathrooms, showers, swimming pools, saunas or even kitchens

Waterproofing membrane

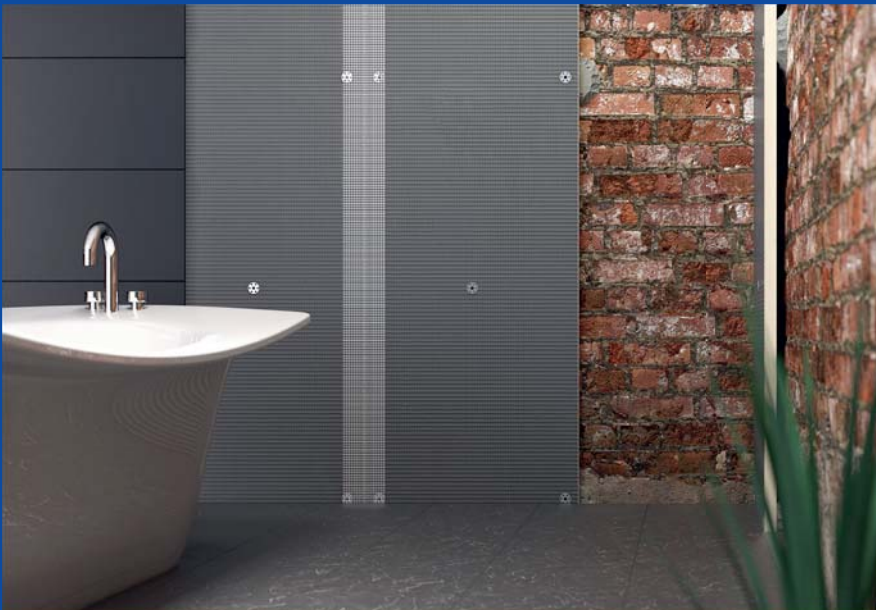

Our crack-bridging CS 990 Waterproofing membrane is used as an economical composite waterproofing under tiles and coverings made of natural stone. It is quick, easy and safe to apply. The CS 990 Waterproofing membrane saves long waiting times and is suitable for walls and floors. Alternatively, our fast-curing and flexible sealing slurries CS 556 Flex slurry RD 1K rapid and CS 557 Flex slurry RD 2K rapid can also be used.

Tile lightweight elements & sealing membrane

Simple, easy, fast, safe and durable!

Please feel free to contact us, even if you do not find the variants you are looking for you do not find in the selection here in the brochure.
